GEMINI CAD SOFTWARE Auto Marker Professional Edition DuoCore Parallel processing on 2 processor cores to performs fast and high efficiency automatic marker optimization ; functions for special markers on stripes and plaids or other printed fabrics, functions for nesting on folded/tubular fabrics, functions for piece grouping for fusing, direct import converters for models and markers from lectra, gerber, assist, investronica, exports data for a wide range of plotters and cutters using HPGL, ISO-CUT and RS274d standard Used for automatic grading and precise shape alteration including high quality MTM applications in apparel and technical textile using geometrical skeletons based on formula Receives and processes the planning orders generated by an ERP/PDM system. SCPS generates multiple planning solutions which are outputed for the ERP/PDM system. Includes direct import converters for models and markers from lectra, gerber, assist. It requires SPM license for the communication with the ERP/PDM system. Performs shape contour tracing and internal elements recognition from digital bitmap images acquired by a calibrated optical system and exports data into standard industry format like DXF or other proprietary file formats; supports also scanner devices for high-precision shape digitizing in technical textile; supports ultra-large digitizing format for bigger patterns Used for automatic grading and precise shape alteration including high quality MTM applications in apparel and technical textile using geometrical skeletons based on formula (DOES NOT INCLUDE PHOTO DIGITIZER HARDWARE)	1	7,995.00	7,995.00
SPECIAL TERMS A initial deposit of \$5,000 will be required to initiate this order. The customer will inspect the equipment and finalize payment terms during the visit.	1	0.00	0.00
