ATTACHMENTS

Attachment 1: Photographs
Attachment 2: Parcel Information – Current
Attachment 3: User Questionnaire
Attachment 4: Environmental Records
Attachment 5: Historical Records
Attachment 6: Interview Documentation
Attachment 7: Professional Qualifications

ACRONYMS

It should be noted that additional acronyms are defined within the Phase I ESA report.

AAI- All Appropriate Inquiry

ACM – Asbestos-Containing Material

AIRS – Permit and emissions inventory data

AST – Aboveground Storage Tank

AULs – Activity and Use Limitations

BEA – Baseline Environmental Assessment

Bgl – Below Ground Level

BTEX – Benzene, Toluene, Ethylbenzene, and Xylene(s)

CERCLIS – The Comprehensive Environmental Response, Compensation, and Liability Information System

CESQG – Conditionally Exempt Small Quantity Generator

CFR – Code of Federal Regulations

CORRACTS – Corrective Action Report

DCE – Dichloroethylene

ECHO – Enforcement and Compliance History Online

EGLE – The Michigan Department of Environment, Great Lakes, and Energy

ERNS (List) – Emergency Response Notification System (List)

FINDS – Facility Index System

FAR – Final Assessment Report

FOIA – United States Freedom of Information Act

FUDS – Formerly Used Defense Sites Program

FIFRA – Federal Insecticide, Fungicide, and Rodenticide Act

FTTS – Federal Insecticide, Fungicide, and Rodenticide Act / Toxic Substances Control Act of 1976 Tracking System

GCC – Generic Cleanup Criteria

HIST AUTO – Historical automotive sites identified by EDR

HIST CLEANER – Historical dry cleaner/drycleaning operation identified by EDR

IAR – Initial Assessment Report

LARA – The Michigan Department of Licensing and Regulatory Affairs

LQG – Resource Conservation and Recovery Act – Large Quantity Generator

LUST – Leaking Underground Storage Tank

Michigan 10 Metals – Arsenic, Barium, Cadmium, Chromium, Copper, Lead, Silver, Selenium, Silver, and Zinc

MLTS – Material Licensing Tracking System

MTBE – Methyl tert-butyl ether

NFA – No Further Action

NonGen/NLR — Non-Generator/No Longer Reporting

NPDES – National Pollutant Discharge Elimination System
NPL – National Priority List (Superfund)
PCB(s) – Polychlorinated biphenyl(s)
PCE – Tetrachloroethylene
PFAS – Per- and polyfluoroalkyl substances
PFOA – Perfluorooctanoic acid
PFOS – Perfluorooctane sulfonic acid
PNAs/PAHs – Polynuclear Aromatic Hydrocarbons
PRP – Potentially Responsible Party
RBSLs –Risk-Based Screening Levels
RCRA – Resource Conservation and Recovery Act
RIDE – Remediation Information Data Exchange
SEMS – Superfund Enterprise Management System
SEMS-ARCHIVE – Superfund Enterprise Management System archive
SPILLS – an EDR listing that refers to some sort of substance spill that has occurred on the site
SQG – Small Quantity Generator
SVOC – Semi-Volatile Organic Compound
TCE – Trichloroethylene
TMB – Trimethylbenzene
TRIS – Toxic Release Inventory System
TSCA – Toxic Substances Control Act of 1976
ug/kg – Microgram per kilogram
ug/L – Microgram per liter
USGS – United States Geological Survey
UST – Underground Storage Tank
VI – Vapor Intrusion
VIAP – Volatilization to Indoor Air Pathway
VOCs – Volatile Organic Compounds
VSQG – (Very) Small Quantity Generator
WDS – Waste Data System

1.0 EXECUTIVE SUMMARY

Triterra conducted a Phase I ESA on behalf of Vision Plumbing LLC for the parcel of land located at 409 Lentz Court in Lansing (Lansing Charter Township), Ingham County, Michigan (the subject property). The Phase I ESA was completed to evaluate for RECs in connection with the subject property.

The Phase I ESA was conducted in conformance with the requirements of American Society for Testing and Materials Designation: E 1527-21 Phase I Environmental Site Assessment Process (ASTM E 1527-21). The Phase I ESA included review of standard federal, state, and tribal environmental records; review of standard historical records; property reconnaissance; interviews to investigate past and current land uses at the subject property; and VEC screening.

Based on Triterra's review of historical information, the subject property appears to be undeveloped land as early as 1938 and is heavily forested. The subject property continued to be undeveloped until the existing commercial structure is constructed in 1972. Known historical occupants include Paramount PTO Chip (1977), Purdlator Courier (1977), Westside Car Care (1995 – 2020). Currently, the subject property building is vacant.

The Phase I ESA has revealed the following REC in connection with the subject property:

- **The potential for contamination on the subject property from historical operations (Section 5.1).** The subject property historically operated as an automotive repair from at least 1995 until approximately 2020. Available records indicated the storage of various hazardous substances on the subject property including new and waste oil, parts washer, Dexron, grease, and antifreeze stored in 275 – 500 gallon tanks or 55-gallon drums. There is potential a leak or release has occurred during operation. Staining was observed on the concrete flooring within the former shop area of the building.

If contamination is present from sources outside of the subject property, this condition could be defended through an exemption under Part 201 of Public Act 451, as amended. The contaminant migration exemption states that a person is not liable for contamination at a property under Part 201 if "the owner or operator of property unto which contamination has migrated unless that person is responsible for an activity causing the release that is the source of the contamination." MCL 324.20126(4)(c).

Additionally, no HRECs or CRECs were identified in connection with the subject property.

Triterra identified the following data gap associated with the historical use of the subject property: Triterra has not received a response from the Township as of the date of this report. Due to the available historical records, it is Triterra's opinion the limitation does not impair the ability to identify RECs. Triterra encountered the following limitation during the subject property walkover: Triterra was unable to access the shed on the subject property. Due to available historical records, it is Triterra's opinion the limitation does not impair the ability to identify RECs.

It is the Environmental Professional's opinion that a subsurface investigation is recommended to determine if contamination is present on the subject property.

2.0 INTRODUCTION

Triterra conducted a Phase I ESA on behalf of Vision Plumbing LLC for the parcel of land located at 409 Lentz Court in the City of Lansing, Ingham County, Michigan (the subject property). The Phase I ESA was completed to identify recognized environmental conditions (RECs) in connection with the subject property.

Satisfying the EPA AAI is one component of the requirements for a Prospective Purchaser to qualify for the Bona Fide Prospective Purchaser (BFPP), Contiguous Property Owner, or Innocent Landowner defense to the CERCLA liability. For properties known to be contaminated with hazardous substances or petroleum products, the BFPP also must comply with the continuing obligations defined in CERCLA to maintain the landowner liability protection (LLP) to CERCLA.

2.1 Purpose

The Phase I ESA is performed in general conformance with the scope and limitations of the American Society for Testing and Materials Designation: E 1527-21 (ASTM E 1527-21). The ASTM standard permits a Phase I ESA User to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations as defined by the CERCLA. The overall purpose of the Phase I ESA practice is to conduct a subject property environmental site assessment regarding a range of contamination that may affect subject property soil, soil gas, and groundwater quality. ASTM defines RECs as:

…(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Special cases of RECs include Historical and Controlled RECs. HRECs are defined as:

…a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

CRECs are defined as:

…recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

In addition to RECs, *de minimis* conditions are also evaluated. ASTM E 1527-21 defines *de minimis* as conditions that a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Scope of Services

In accordance with ASTM E 1527-21, the Phase I ESA performed by Triterra consists of the main components listed below. Each component contributes to the identification of RECs in connection with the subject property. "Commonly known or reasonably ascertainable information" about the subject property and a "degree of obviousness of the presence or likely presence of contamination" at the subject property are considered part of the Phase I ESA.

- Records Review
- Subject Property Reconnaissance
- Interviews
- Vapor Encroachment Screen
- Evaluation and Preparation of Phase I ESA Report

Records review includes a review of federal, state, tribal, and local government records and historical sources. The gathered information helps identify previous uses of the subject property and the surrounding area. Knowledge of the historical uses may determine if a current subject property REC is a result of the historical subject property/surrounding area operations. The records review is summarized in Section 4.0.

Subject property reconnaissance includes a visual and physical inspection of the subject property and visual observation of adjoining properties. This does not include sampling or testing of any material unless specified by an agreement between Triterra and the User before sample collection. The site reconnaissance is summarized in Section 6.0.

Interviews are conducted with subject property owners and/or occupants. Select state and/or local agency officials are also interviewed. The interviews provide otherwise unavailable information about the subject property. Information obtained during interviews is included in Sections 3.0 through 5.0 and 8.0.

A vapor encroachment screen (VES) is a Tier I component of the ASTM E 2600-22 Standard Guide that identifies if a vapor encroachment condition (VEC) exists at the subject property. A VEC is the potential presence of chemical of concern vapors in the subject property subsurface caused by a release of contaminated soil or groundwater vapor on or near the subject property. Triterra evaluates surrounding properties using The Plume Test and Critical Distance Determination Buonicore Methodology. Potential VECs are identified throughout the Phase I ESA report.

An evaluation of all gathered subject property information is presented within the Phase I ESA Report. Appropriate documentation supports the findings, opinions, and conclusions. The Phase I ESA report includes matters required pursuant to various provisions of ASTM E 1527-21.

2.3 Special Terms, Conditions, and Significant Assumptions

Pursuant to the ASTM E 1527-21, Triterra assumes that the information provided by all sources and parties including the User is accurate and complete except where obvious inconsistencies or inaccuracies are identified. The possible contaminants of concern considered in this assessment include those listed under CERCLA as well as petroleum products, and PFAS constituents as regulated by EGLE Part 201 Residential GCC. There were no special terms, conditions, or significant assumptions associated with the Phase I ESA.

2.4 Limitations and Exceptions

Triterra completed this Phase I ESA in general conformance with the ASTM E 1527-21 standard practice and made appropriate inquiry consistent with good commercial or customary practice. The results of the Phase I ESA are based on professional interpretation of the practically reviewable and reasonably ascertainable information available to Triterra given the time and budget constraints of the project. Triterra has assumed that information provided by the cited references is factual, complete, and correct. Triterra does not warrant that this report represents an exhaustive study of all possible environmental concerns at the subject property. However, the items investigated as part of this study represent likely potential sources of RECs and consequently may identify potential impact to soil, groundwater, and soil gas at the subject property.

2.5 Contractual Agreement

This Phase I ESA was performed in accordance with the September 27, 2024 contract by and between Horizon Bank and Triterra.

2.6 User Reliance

This Phase I ESA report was prepared exclusively for Vision Plumbing LLC and Horizon Bank (referred to as the User) for the purposes stated in this report. The report may be unsuitable for other uses, and reliance on its contents by a party other than the User is done at the sole risk of that party.

3.0 SUBJECT PROPERTY DESCRIPTION

The following subsections contain subject property descriptions, uses, and conditions. Adjoining site operations during the time of the Phase I ESA were also researched. Photographs of the subject property and surrounding areas are included in Attachment 1.

3.1 Subject Property Location and Legal Description

The subject property is located at 409 Lentz Court in the City of Lansing, Ingham County, Michigan in Township 4N, Range 02W, Section 18 (Figure 1). Triterra obtained subject property assessing and building information from BS&A on October 4, 2024. Current subject property parcel information and tax identification number 33-21-01-18-451-001 are included in Attachment 2.

3.2 Subject Property Use and General Characteristics

The subject property consists of approximately 0.35-acres developed with an approximately 7,046-square foot, single-story commercial building utilized for automobile repair services. The remainder of the subject property consists of paved parking space. Subject property layout and boundaries are depicted on the subject property Orientation Diagram (Figure 2).

Electrical services are provided by the Lansing Board of Water and Light. Natural gas is provided by Consumers Energy. West Side Water provides potable water and sewer services to the subject property OR The subject utilizes an on-site drinking water well and septic system.

3.3 User Provided Information

The ASTM E 1527-21 standard outlines the User responsibilities to assist in the identification of RECs in the connection with the subject property. On October 7, 2024, Mr. Trevor Easterling, the User representative, completed a User Questionnaire that is presented in Attachment 3. Mr. Easterling indicated he had no specialized knowledge pertaining to the subject property. No indications of RECs were identified in Triterra's review of the questionnaire.

3.4 Environmental Liens or Activity and Use Limitations

Reviewing land title records for AULs and environmental liens (or judicial records where applicable) is a User's responsibility.

On October 8, 2024, Triterra confirmed that Mr. Trevor Easterling has not completed their responsibility to "*search for the existence of environmental liens and AULs that are filed or recorded against the subject property*." Therefore no records, or information thereof has been provided to Triterra.

On October 4, 2024, Triterra reviewed the Remediation and Redevelopment Division Perfected Lien List, obtained from the EGLE website. According to EGLE, the information provided represents the most current publicly accessible list of properties associated with state environmental liens. No recorded environmental liens were identified in connection to the subject property.

On October 4, 2024, Triterra reviewed the USEPA Institutional and Engineering Controls Data for properties

located in Michigan. No recorded Institutional and Engineering Controls Data were identified in connection to the subject property.

On October 4, 2024, Triterra reviewed the EGLE Environmental Mapper for known Activity Use Limitations associated with the subject property. According to the EGLE Environmental Mapper, no AULs are associated with the subject property.

3.5 Current Uses of the Adjoining Sites

Known current uses of adjoining sites are summarized in the following table:

Direction	Name Address	Activity
North	Waverly Easy Intermediate School 3131 W. Michigan Avenue	School
East	Kegnado 400 Business Centre Drive	Restaurant Supply Store
	Engine Technology Inc 410 Business Centre Drive	Engine Rebuilding Service
South	National Seating & Mobility 419 Lentz Court	Medical Supply Store
West (Across Lentz Court)	Ameri-Vend Services 412 Lentz Court	Vending Machine Supplier
	404 Lentz Court	Vacant

4.0 ENVIRONMENTAL RECORDS REVIEW

Triterra interviewed individuals, reviewed environmental and historical records, and reviewed local physiographic, geologic, and hydrologic information to determine historical and current land ownership and use, physical setting, and identify RECs associated with the subject property. The records and data sources were searched, and the pertinent findings are provided below.

- United States Geological Survey 7.5 Minute Quadrangle Topographic Map
- Michigan Department of Environment, Great Lakes and Energy - Scanned Water Well Records
- Michigan Department of Environment, Great Lakes and Energy – Environmental Mapper
- Environmental Data Resources Radius Map™ Report with Geocheck ®
- Michigan Department of Environment, Great Lakes, and Energy - Remediation Information Data Exchange (RIDE)
- Michigan Department of Licensing and Regulatory Affairs
- Michigan Department of Environment, Great Lakes and Energy and Licensing and Regulatory Affairs Storage Tank Division Information Database
- Ingham County Health Department
- City of Lansing – Fire Department

4.1 Physical Setting

According to the topographic map, the subject property is approximately 880-feet above mean sea level and relatively flat. The general topography trends downwards toward the north-northeast. The nearest surface water body is a pond located approximately 130-feet northwest from the subject property.

Triterra queried the EGLE Well Record Retrieval System and/or GeoWebFace pertaining to well logs and subsurface information. According to the available water well records for the surrounding area, soils in the vicinity of the subject property generally consist of clay and gravel to approximately 95 feet below grade. Groundwater was encountered between 85 and 124 feet below grade.

According to the State Soil Geographic (STATSGO) and Soil Survey Geographic (SSURGO) database information, urban land is the dominant soil type found on the subject property. This particular soil component type has moderate infiltration rates and possesses soils which impede the downward movement of water and/or have moderately coarse textures.

The shallow water table is often a subdued expression of surface topography. Shallow groundwater generally flows from areas of groundwater recharge (hills and broad uplands) to areas of groundwater discharge (wetlands, river, and lakes). Based on the local surface topography, local shallow groundwater is expected to flow generally north-northeast. Other man-made features such as wells, roads, filled areas, buried utility lines and sewers, and drainage ditches may alter the natural shallow groundwater flow direction.

4.2 Environmental Database Search

Triterra retained Environmental Data Resources, Incorporated (EDR) to conduct an environmental records search of the following standard, federal, and state databases to identify documented sites that may represent RECs on and near the subject property. Portions of an October 1, 2024 environmental records search report prepared by EDR are provided in Attachment 4. The report contains information that is used to identify sites that may represent RECs and lists and describes sites within their respective ASTM E 1527-21 search radii of the subject property. Sites mapped by EDR are listed in the Map Findings Summary on page 4 and their location is shown on the maps preceding page 4 of the EDR report. The EDR report also provides a detailed summary of each site. Unmapped sites, as identified by EDR, are sites that for various reasons cannot be mapped through the EDR query system.

Triterra identified sites of potential concern from the EDR report and present them in the table below. Unmapped sites determined by Triterra as potential concerns within the applicable approximate minimum search distance(s) and to be suspect RECs are also included in the table. Based on the assumed groundwater flow direction, local topography, current status of the site, and/or distance from the subject property, the remaining mapped and unmapped sites do not appear to represent suspect RECs in connection with the subject property. For each site of potential concern, Triterra reviewed federal, state, tribal and local government records and historical sources, as necessary. Historical sources reviewed during the investigation are referenced in Section 5.0. Descriptions of the identified sites of potential concern are provided below.

EDR SITES OF POTENTIAL CONCERN		
Site Name and Address	**Approximate Distance and Direction from subject property[1]**	**Name of List[2]**
Sterling Press Inc 419 Lentz Court	South adjoining	RCRA-VSQG, FINDS, ECHO
Huntington Cleaners 425 Lentz Court	180-feet south	HIST CLEANER
Brians Prfmce Transmissions 458 Lentz Court	400-feet southwest	HIST AUTO
Sams Auto Mechanical Service 455 Lentz Court	440-south	HIST AUTO

[1]EDR sites are mapped by address. Distances and/or site directions listed above may be adjusted from those reported by EDR to better represent field conditions and potential site boundaries.
[2]Definitions of acronyms and lists are presented in the EDR report.

Sterling Press Inc – 419 Lentz Court adjoins the subject property to the south and is listed as a RCRA-VSQG, FINDS, and ECHO site. According to the WDS web page, the sit was listed as a CESQG since January 19, 1995. No violations or evaluations have been reported. It is Triterra's opinion the site does not represent a REC in connection with the subject property.

Huntington Cleaners – 425 Lentz Court (currently CRDN) is located approximately 180-feet south of the subject property and is listed as a historical dry cleaning site. According to available historical records, the

site operated as a dry cleaner from approximately 2002 to 2014. Dry cleaning operations commonly involve the usage of general hazardous substances and/or petroleum products, which, if improperly managed and/or disposed of, can be a source of contamination. During the time period of operation (the early 2000s), major environmental regulations, and waste management and disposal procedures had been implemented. In Triterra's experience, modern dry cleaners typically perform dry cleaning operations offsite and hazardous substances are not stored or used onsite. It is Triterra's opinion the site does not represent a REC in connection with the subject property.

Brians Prfmce Transmissions – 458 Lentz Court (currently vacant) is located approximately 400-feet southwest of the subject property and is listed as a historical automotive transmission site. According to available historical records, the site operated as an automotive transmission repair from approximately 2011 until 2014. Automotive repair operations are associated with various hazardous substance that have to ability to impact the subsurface if managed and/or disposed of improperly. However, due to distance from the subject property to the area of former operations, it is unlikely any potential contaminants onsite could migrate onto the subject property. It is Triterra's opinion the site does not represent a REC in connection with the subject property.

Sams Auto Mechanical Service – 455 Lentz Court (currently vacant) is located approximately 440-feet south of the subject property and is listed as a historical general automotive repair shop. According to available historical records, the site operated as an automotive repair from approximately 1991 until 2014. Automotive repair operations are associated with various hazardous substance that have to ability to impact the subsurface if managed and/or disposed of improperly. However, due to distance from the subject property to the area of former operations, and due to the short time span of operations (i.e. from approximately 2011 to 2014), it is unlikely any potential contaminants onsite could migrate onto the subject property. It is Triterra's opinion the site does not represent a REC in connection with the subject property.

4.3 Additional Environmental Record Sources

4.3.1 Health Department Records

Triterra contacted the Ingham County District Health Department to request any available information pertaining to environmental concerns associated with the subject property, including information on any septic systems and water wells located on the subject property. On October 3, 2024, Triterra received a response from the County pertaining to chemical storage on the subject property.

Triterra received the Pollution Incident Prevention Plan (PIPP) completed for the subject property. According to the PIPP, dated February 15, 2007, the site was identified as Westside Car Care, an automotive repair operation. As indicated by the PIPP, the table on the following page describes the substances stored on the subject property and their quantities.

Substance	Quantity (gallons)
New Oil (5w-30)	(1) 275 tank
New Oil (10w-30)	(1) 275 tank
New Oil (10w-40)	(1) 55 drum
New Oil (5w-20)	(1) 55 drum
Waste Oil	(1) 500 tank
Waste Oil	(1) 450 tank
Waste Oil	(1) 275 tank
Parts Washer	(1) 30 drum
Dexron	(1) 275 tank
Grease	(1) 15 drum
Antifreeze	(4) 55 drums

According to correspondence between the Ingham County Health Department and Mr. Troy Sika of Westside Car Care, the PIPP was determined to meet the Ingham County Health Department's requirements for a PIPP and was approved.

In addition, multiple hazard waste inspection records were provided to Triterra. A compliance inspection conducted on July 10, 1995 identified the following violation: "Secondary containment is required for the outside waste oil storage." On November 2, 1995, correspondence between the Ingham County Health Department and Mr. Troy Sika of Westside Car Care indicated that secondary containment storage was in the process of being constructed.

According to the most recent inspection record provided to Triterra, dated September 1, 2022, the operation was found to be in substantial compliance with the Ingham County Pollution Prevention Regulation.

It is Triterra's opinion the chemical storage on the subject property represents a REC due to observed poor housekeeping conditions and due to the presence of floor drains within the subject property building leading to the septic system.

4.3.2 Fire Department Records

Triterra contacted the Lansing Charter Township to request any available fire department and building records associated with the subject property on October 1, 2024. Triterra has not received a response from the Township as of the date of this report. Due to available historical records, it is Triterra's opinion the limitation does not impair the ability to identify RECs.

4.3.3 Geological Survey Records

Triterra queried the State of Michigan Geological Survey Division's (GSD) Drilling Unit Maps for oil and gas permits/wells for the subject property's township, range, and section number. According to the October 17, 2024 query results, no known active oil and/or gas wells exist, and no permits have been recorded for the subject property.

4.3.4 Other Environmental Records

No other environmental records were reviewed as a part of this Phase I ESA.

5.0 HISTORICAL RECORDS REVIEW

Triterra reviewed historical records to develop a history of the subject property and surrounding area and identify any past uses that may have led to RECs in connection with the subject property. Abstracted histories of the subject property and proximate sites, which Triterra obtained from reasonably ascertainable historical records, are provided in the table below. Copies of the available historical records are provided in Attachment 5.

Triterra reviewed the following historical records:

- Sanborn Fire Insurance Maps (subject property is unmapped)
- Aerial Images (1938, 1950, 1956, 1963, 1976, 1981, 1993, 1998, 2006, 2009, 2012, 2016, 2020)
- City Directories (1910, 1916, 1919, 1923, 1928, 1933, 1938, 1941, 1946, 1951, 1955, 1960, 1964, 1968, 1972, 1977, 1982, 1987, 1992, 1995, 2000, 2005, 2010, 2014, 2017, 2020).
- Topographic Maps (1910, 1912, 1965, 1973, 2014, 2017, 2019)
- User Interview (see Section 3.3)
- Owner Interview (see Section 7.1)
- Consumers Energy SIMS
- Subject property walkover (See Section 6.0)

5.1 Subject Property – Historical Use Information

A summary of historical usage of the subject property back to 1938, the date of earliest readily available records, is presented in the following table:

Based on Triterra's review of historical information, the subject property appears to be undeveloped land as early as 1938 and is heavily forested. The subject property continued to be undeveloped until the existing commercial structure is constructed in 1972. Known historical occupants include Paramount PTO Chip (1977), Purdlator Courier (1977), Westside Car Care (1995 – 2020). Currently, the subject property building is vacant.

The subject property has operated as an automotive repair operation since at least 1995. Automotive repair operations are associated with the usage and storage of various hazardous substances. Refer to Section 4.3.1 for more information regarding chemical storage on the subject property. In Triterra's opinion, the historical use of the subject property represents a REC in connection with the subject property.

Triterra did not identify data gaps associated with historical subject property uses.

5.2 Historical Heating Source

According to the Consumers Energy Service Information Management System (SIMS) website, natural gas was routed to the subject property in 1972. The subject property was undeveloped land prior to 1972, there it is unlikely that alternative heating fuels (i.e. steam, propane, wood, electric, coal, and/or fuel oil) were used by previous occupants of the subject property prior to the connection of natural gas. It is Triterra's opinion the historical heating source does not represent a REC in connection with the subject property.

In the event that historical heating sources (i.e. coal/ fuel oil, etc.) are encountered during future development or subject property use, Triterra recommends the source be properly removed and disposed in accordance with applicable federal, state, and local regulations.

5.3 Proximate Sites of Potential Concern – Historical Use Information

An attempt was made to assess the historical uses of proximate sites by reviewing records referenced in Section 5.0.

The east adjoining property (400 Business Centre Drive), was undeveloped land as early as 1938 and is heavily forested at this time. The existing commercial building is constructed in 1993. Known historical occupants include Audio Visual Tech (1995), A&M Aquatics (2000), Mosher David W Contractor Inc (2000), PJs 24 Hour Towing (2010), Renewal Property Services (2014), A&M Aquatics (2020), JTD Cycle (2020). Currently, the site is occupied by Kegnado, a restaurant supply store. Triterra identified no RECs in connection with the subject property.

The west adjoining property (412 Lentz Court) was undeveloped land as early as 1938 and is heavily forested at this time. The existing commercial building is constructed sometime between 1956 and 1963. Known historical occupants include Promer Heating Service (1964), Ambassador Coffee (1992 – 2000), Ameri-Vend Services (1992 – Current). Currently, the site is occupied by Ameri-Vend Services, a vending machine supplier. Triterra identified no RECs in connection with the subject property.

The north adjoining property (3131 W Michigan Avenue) was undeveloped land as early as 1938 and is partially forested at this time. The existing school building and associated baseball fields are constructed sometime between 1956 and 1963. The historical occupants of the site are unknown to Triterra, however, due to the size and shape of the building indicates the site was likely utilized for educational purposes. Currnently, the site is occupied by Waverly East Intermediate School. Triterra identified no RECs in connection with the subject property.

The south adjoining property (419 Lentz Court) was undeveloped land as early as 1938 and is partially wooded at this time. The existing commercial building is constructed in 1975. Known historical occupants include Amer Educational Service (1977 – 1995), Caribou Mountaineering (1987 – 1992), Content Hotline (1987– 1992), Corporate Director (1987– 1992), Specialty Store (1987– 1992), Vanguard Publications (1987), Skye Babe (2020). Currently, the site is occupied by National Seating & Mobility, a medical supply store. Triterra identified no RECs in connection with the subject property.

No adjoining sites of concern were identified in the course of researching the subject property itself.

Triterra did not identify data gaps associated with historical uses on adjoining sites of potential concern.

6.0 SUBJECT PROPERTY RECONNAISSANCE

The subject property reconnaissance was conducted to identify evidence of the presence of suspect RECs in connection with the subject property. Descriptions of the current subject property use and conditions are presented in the following sections.

6.1 Methodology and Limitations

On October 4, 2024, Meredeth Crane on behalf of Triterra completed a subject property walkover to observe and record the subject property use and conditions. Meredeth was accompanied by Julie O'Brien of Colliers International (Owner Representative) during the subject property walkover. Photographs taken during the walkover are included in Attachment 1.

The following limitation was encountered during Triterra's subject property walkover: Triterra was unable to access the small storage shed during the visit, the shed was zip-tied closed.

6.2 General Observations

The subject property consisted of a one-story commercial building containing approximately 2,000 square feet of office space and approximately 5,000 square feet of warehouse space with a small mezzanine space. The remainder of the subject property consisted of paved parking, a small shed, and landscaping. At the time of the reconnaissance, the building was vacant.

6.2.1 Chemical Use, Storage, and Disposal

Triterra observed common cleaning chemicals, latex paint, and automotive repair fluids which were stored in containers with volumes of five gallon or less and were reportedly consumed during use. No leaks, stains, or spills were observed proximate the observed chemical storage. Triterra identified no suspect RECs associated with the observed chemical use and storage in the buildings on the subject property.

6.2.2 USTs and ASTs

Triterra did not observe evidence of current or former UST systems (e.g., vent pipes, fill ports, dispensing pumps, patched pavement, etc.) nor evidence of current or former AST systems (e.g., stands, secondary containments, etc.) on the subject property.

6.2.3 PCB Containing Equipment

Triterra observed no visual evidence of PCB-containing equipment located on the subject property.

6.2.4 Drains and Sumps

Triterra observed a trench drain within the warehouse portion of the building. Triterra observed dark staining on the floor proximate the trench drains. The trench drains appeared to be in working condition and reportedly lead to the septic system. It is Triterra's opinion the drains within the subject property building represent a REC due to poor housekeeping conditions.

6.2.5 Pits, Ponds, and Lagoons

Triterra observed no visual evidence of pits, ponds, or lagoons on the subject property.

6.2.6 Heating and Cooling

The office building is heated by a natural gas-fired forced-air furnace and the warehouse is heated with ceiling mounted space heaters.

6.2.7 Solid Waste Generation and Disposal

Triterra observed no exterior visual evidence of the generation, treatment, storage, or disposal of solid wastes at the subject property.

6.2.8 Additional Features

Triterra observed no visual evidence of additional features at the subject property which were indicative of suspect RECs in connection with the subject property.

6.3 Proximate Site Observations

Refer to Section 3.5 for a list of adjoining sites. Triterra observed no evidence of conditions on adjoining sites that would potentially impact the subject property.

7.0 INTERVIEWS

Information obtained from interviews was used to determine historical and current land ownership and use and is discussed below. Information obtained during the interviews is included in Attachment 6 and is discussed in context in Sections 5.0 and 6.0.

7.1 Subject Property Owner

On October 2, 2024, Ms. Sandra Sika, the Owner representative, completed a questionnaire that is included in Attachment 6. Ms. Sika indicated that the site is currently vacant, but has been utilized for auto repair operations in the past. Mr. Sika indicated that 275-gallon ASTs have existed on the subject property in containment bins at one point, and that tires were formerly stored outside the building to be recycled on a regular basis. Mr. Sika indicated that there are stains within the subject property building associated with the former auto repair operations. It is Triterra's opinion the former automotive repair operations represent a REC in connection with the subject property.

7.2 Past Owner, Operators and/or Occupants

Past owners, operators, and occupants were not identified and/or available at the time of this report.

7.3 State and/or Local Agency Officials

Refer to Sections 4.3.1 and 4.3.2 for a discussion of State and Local agency provided information for the subject property.

7.4 Other Individuals

Given that the subject property is not abandoned and no evidence of uncontrolled access or dumping was observed during the site visit, no adjoining property owners were interviewed during the course of this investigation.

8.0 NON-SCOPE SERVICES

8.1 Per- and polyfluoroalkyl substances

PFAS are found in various industrial applications and consumer products such as carpeting, waterproof clothing, upholstery, food paper wrappings, personal care products, fire-fighting foams, and metal plating. They are long lasting chemicals, components of which break down very slowly over time. Exposure to some PFAS in the environment may be linked to harmful health effects in humans and animals. Michigan has identified several PFAS analytes within EGLE Part 201 GCC for groundwater; no Part 201 GCC currently exists for soil.

8.1.1 Michigan PFAS Action Response Team (MPART)

The Michigan PFAS Action Response Team (MPART) is a multi-discipline agency with the goal of identifying sources of PFAS, addressing PFAS contamination at the sources, and working with local health departments to protect people in areas where groundwater is impacted by PFAS. MPART efforts have begun sampling drinking water, surface water, groundwater, and wastewater from wastewater treatment plants (WWTP), municipal and residential drinking water wells, surface water bodies, fire departments, landfills, commercial airports, and various manufacturing, industrial, superfund and hazardous waste sites throughout Michigan since 2018.

According to the mapper, no PFAS sites were identified at the time of this report within one mile of the subject property.

8.1.2 Historical and Current Operations

Triterra reviewed records referenced in Section 5.0. to identify current and historical operations associated with PFAS manufacture or use on the subject property and adjoining sites. Operations associated with PFAS include commercial and military airports, military bases and training sites, fire departments, metal plating, chemical manufacturers (ex. DuPont, 3M/Dyneon, BASF, Ciba, Clariant, Chemguard, Arkema, Asahi, Daikin, Kiddle-Fenwal, National Foam, Dynax, and Solvay Solexis), manufacturing (ex. non-stick surface, water repellants, and stain resistant products), cosmetics, aerospace, automotive, construction, and electronics.

According to a review of historical records referenced above, no adjoining sites were identified to have an elevated risk of PFAS containing materials.

8.1.3 Subject Property Fire Suppression

There are two major types of firefighting foam, Class A and Class B. Class A foams generally do not contain PFAS. Class B foams can be divided into two categories: fluorinated foams and fluorine-free foams. Fluorinated foams contain PFAS, and fluorine-free foams do not. Of the fluorinated foams, aqueous film forming foams or “AFFF” are the foams that contain varying amounts and mixtures of PFAS.

Class B firefighting foams are commercial surfactant solutions that are utilized for fire suppression, fire training, and flammable vapor suppression at military installations, airports, petroleum refineries and bulk storage facilities, and chemical manufacturing plants and storage facilities. Additionally, local fire departments in communities have used and may maintain quantities of Class B firefighting foam in their

inventories for use in training and emergency response.

Triterra encountered no evidence a fire has occurred on the subject property, therefore it is unlikely class B firefighting foams were used on the subject property.

8.1.4 Biosolid Application

Biosolids are solid organic matter recovered from a wastewater sewage treatment process and used as fertilizer. Historically, biosolid type fertilizer has been applied to select agricultural fields. This material has been documented to potentially contain PFAS in higher rates than animal manure, or synthetic fertilizers. EGLE provides documentation of such applications within the MiEnviro website.

Triterra reviewed the MiEnviro website, no fields applied with biosolid type materials were identified on or adjoining the subject property.

8.2 Additional Non-scope services

No additional non-scope services were performed during this Phase I ESA.

9.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Triterra has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-21 for the parcel of land located at 409 Lentz Court, Lansing (Lansing Charter Township), Ingham County, Michigan. Any exceptions to or deletions from this practice are described in Section 2.4 of this report.

The assessment has revealed the following REC in connection with the subject property:

- **The potential for contamination on the subject property from historical operations (Section 5.1).** The subject property historically operated as an automotive repair from at least 1995 until approximately 2020. Available records indicated the storage of various hazardous substances on the subject property including new and waste oil, parts washer, Dexron, grease, and antifreeze stored in 275 – 500 gallon tanks or 55-gallon drums. There is potential a leak or release has occurred during operation. Staining was observed on the concrete flooring within the former shop area of the building.

Additionally, no HRECs or CRECs were identified in connection with the subject property.

Triterra identified the following data gap associated with the historical use of the subject property: Triterra has not received a response from the Township as of the date of this report. Due to available historical records, it is Triterra's opinion the limitation does not impair the ability to identify RECs. Triterra encountered the following limitation during the subject property walkover: Triterra was unable to access the shed on the subject property. Due to available historical records, it is Triterra's opinion the limitation does not impair the ability to identify RECs.

10.0 AUTHOR & ENVIRONMENTAL PROFESSIONAL SIGNATURES

This Phase I ESA was prepared by Ms. Alexsis Bowen (Environmental Scientist) and reviewed by Ms. Melissa Hunter (Associate Geologist | Director of Due Diligence) on behalf of Triterra. Please direct any questions to Triterra at (517) 702-0470 or visit our webpage at www.triterra.us.

I, Melissa Hunter, declare to the best of my professional knowledge and belief that I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Ms. Alexsis Bowen

Phase I Environmental Site Assessment
USER QUESTIONNAIRE

This questionnaire outlines the user responsibilities discussed within the American Society of Testing & Materials (ASTM) Method E 1527-13 "Standard Practice for Conducting Environmental Site Assessments: Phase I Environmental Site Assessment Process." In order to qualify for the Landowner Liability Protections (LLPs) offered by the Business Liability Relief and Brownfields Revitalization Act of 2001, the user must provide the following information (if available) to Triterra. Failure to provide this information may result in a determination that "all appropriate inquiry" is not complete.

Please complete this questionnaire to the best of your knowledge. **Please provide any legal descriptions, surveys, title records, parcel maps, environmental reports, etc.**

This questionnaire was completed by: Trevor Easterling

Phone number: 517-706-7602 Email: trevor@visionplumbingllc.com

Affiliation with the Property: Buyer Years affiliated with the Property: 0

Property address: 409 Lenz Court, Lansing, MI 48917

Property parcel number(s): _____

Reason for conducting the Phase I ESA: ☑ Purchase ☐ Sale ☐ Refinancing ☐ Other: _____

☐ Qualify for Landowner Liability Protections ☐ Qualify for Government Regulated Program

Purchasing Entity or Purchaser(s): Vision Plumbing LLC

Address: 1677 Snyder Rd, East Lansing MI, 48823

Phone # and email: 517-706-7602 trevor@visionplumbingllc.com

Lender, if applicable: _____

Address: _____

Phone # and email: _____

Have you completed a title search including environmental liens against the Property ☐ Yes ☑ No

Are there any environmental liens or any Property land-use restrictions that are recorded under federal, tribal, state of local law? ? ☐ Yes ☑ No If yes, explain: _____

_____

Do you have any specialized knowledge of the Property or proximate site operations? ☐ Yes ☑ No

Explain: _____

Does the purchase price of the property reasonably reflect the fair market value of the property?

☑Yes ☐No If *No*, is lower purchase price due to known or perceived contamination? ☐Yes ☐No

Is there any obvious presence of Property contamination? ☐Yes ☑No ☐Unknown Explain: _____

Do you have any knowledge of aboveground/underground storage tanks, petroleum and/or hazardous substance releases, contamination, environmental cleanups, specific chemicals, etc. on the Property?

☐Yes ☑No Explain: _____

Do sites adjoining the Property have any known environmental issues? ☐Yes ☑No ☐Unknown

Explain: _____

Identify utilities available to the Property and **indicate the provider**:

- ☐ Electric: BWL
- ☐ Gas: Consumers Energy
- ☐ Sanitary Sewer: Not sure
- ☐ Storm Sewer: Not sure
- ☐ Municipal Water: West Side Water
- ☐ Municipal Solid Waste: _____
- Private Well? No
- Private Septic? No

Any other pertinent information: N/a

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 08/27/2024 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 6 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal leaking storage tanks

MI LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's Leaking Underground Storage Tank (LUST) Database.

A review of the MI LUST list, as provided by EDR, and dated 05/07/2024 has revealed that there are 12 MI LUST sites within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

MI PART 201: A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

A review of the MI PART 201 list, as provided by EDR, and dated 04/16/2024 has revealed that there

are 21 MI PART 201 sites within approximately 1 mile of the target property.

MI INVENTORY: The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

A review of the MI INVENTORY list, as provided by EDR, and dated 04/16/2024 has revealed that there are 8 MI INVENTORY sites within approximately 0.5 miles of the target property.

MI DEL PART 201: A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

A review of the MI DEL PART 201 list, as provided by EDR, and dated 04/16/2024 has revealed that there is 1 MI DEL PART 201 site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 14 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected

listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal June 24, 1988): Adam s Plating has conducted electroplating operations on a 1-acre site in a heavily populated area in Lansing, Ingham County, Michigan, since 1964. Before 1964, a dry cleaner was on the site andstored solvents in underground tanks. During 1964-71, according to the owner, chromium-containing plating wastes were discharged directly to an underground tile drainage field. Subsequently, the wastes were stored in an underground tank, which was removed in the early 1980s. In response to a call to the State s Pollution Emergency Alert System in January

ADAM'S PLATING (Continued) **1000303229**

1981, the Michigan Department of Natural Resources MDNR) inspected a residence at 510 North Grace, the second residence tothe south of Adam s Plating. MDNR found that waste water with a high chromium content 150 parts per million) was saturating soils and had entered the basement. It appeared that the waste water was entering from a drain whose underground connecting pipe had been broken during recent construction in the neighborhood. In 1981, MDNR found 1,1,1-trichloroethane a dry cleaning solvent) and chromium in soil on the Adam s site. Soil in the area is permeable and ground water shallow 4 feet), conditions that facilitate movement of contaminants into ground water. An estimated 185,600 people obtain drinking water from municipal wells within 3 miles of the site. Status March 31, 1989):
EPA is considering various alternatives for the site.

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

MI DEPT/MILITARY & VETERANS AFFAIRS (Continued) **1000237918**

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

MICHIGAN BELL TELEPHONE COMPANY (Continued) **1004722893**

storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/27/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/07/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

INVENTORY: Inventory of Facilities

The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

PART 201: Part 201 Site List

A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

DEL PART 201: Delisted List of Contaminated Sites

A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion.
A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Lien List

An Environmental Lien is a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 USC * 9607(1) and similar state or local laws. In other words: a lien placed upon a property's title due to an environmental condition

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Latitude (North):	42.730057 - 42° 43' 48.21''
Longitude (West):	84.591565 - 84° 35' 29.63''
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	697174.9
UTM Y (Meters):	4733437.0
Elevation:	880 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14450232 LANSING SOUTH, MI
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

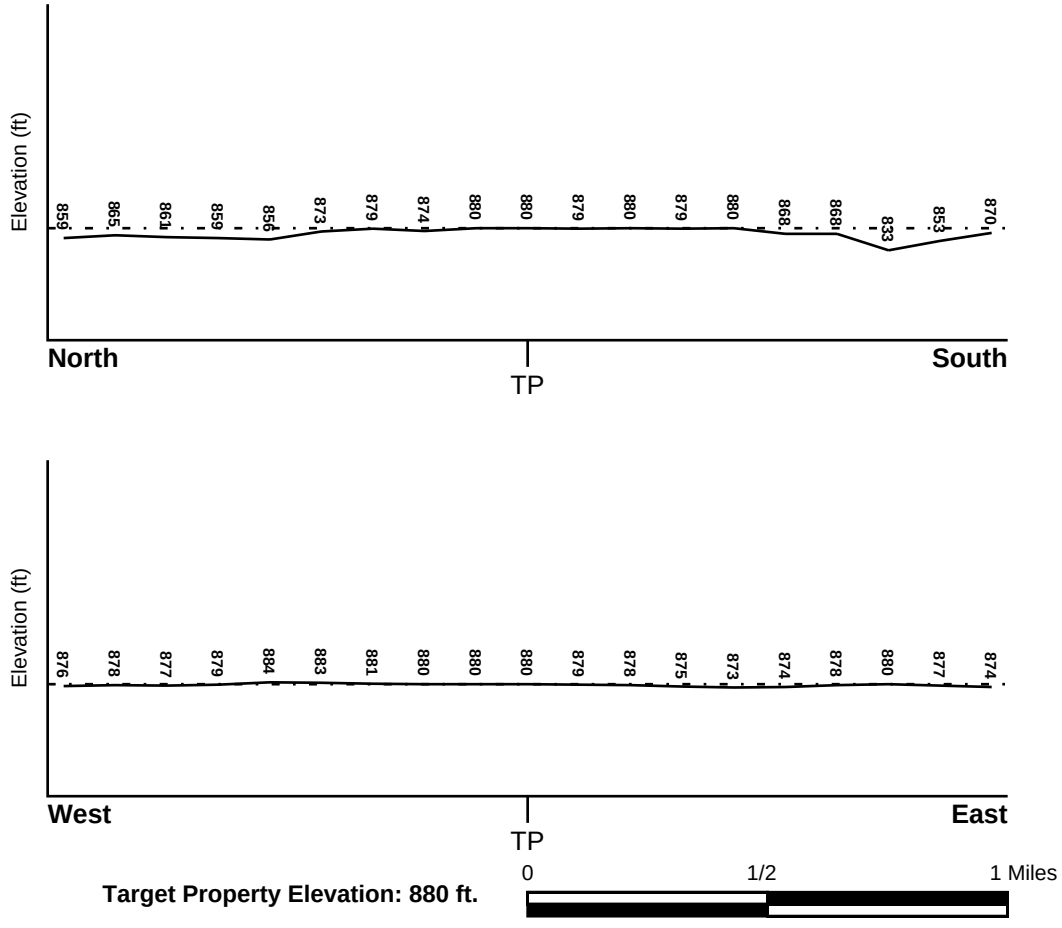

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
26065C0127D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
26065C0126D	FEMA FIRM Flood data
26045C0228E	FEMA FIRM Flood data
26065C0128D	FEMA FIRM Flood data
26065C0129D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LANSING SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
7	1/4 - 1/2 Mile ESE	NW
15	1/2 - 1 Mile NNE	Not Reported
1G	1/2 - 1 Mile NNE	Not Reported
2G	1/4 - 1/2 Mile ESE	NW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 130 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Owner:	WAELSEN, ROBERT	Well Depth (ft):	194
Well Type:	Unknown	Other Type Info:	Not Reported
Well Status:	Not Reported	Other Status Info:	Not Reported
Water Supply Serial #:	0	Well #:	Not Reported
Driller ID:	Not Reported	Drill Method:	Unknown
Other Method Info:	Not Reported	Construction Date:	24-FEB-58
Case Type:	Unknown	Other Casing Info:	Not Reported
Case Diameter (in):	3	Case Depth (ft):	88
Screen Start Depth (ft):	0	Screen End Depth (ft):	0
Static Water Level (ft):	65	Flowing:	N
Test Drawdown Depth (ft):	0	Test Hours:	0
Test Rate:	11	Test Method:	UNK
Well Grouted:	Y	Pump Capacity (gpm):	0
Elevation (ft):	870	Specific Capacity:	0
Rock Top (ft):	80

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Natural Resources
Telephone: 517-241-2254

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Data
Source: Department of Environmental Quality
Telephone: 517-335-9218
The data in this file was obtained from Wellogic, the Michigan Department of Environmental Quality Statewide Groundwater Database (SGWD). Wellogic contains approximately 425,000 water well records found within the State of Michigan, and although it represents the best available data, it cannot be considered a complete database of all the wells or well records in existence. Locations of verified municipal and private water well sites compiled from Michigan Department of Public Health, Water Well and Pump Records. Available in the following MI counties: Calhoun, Eaton, Genesee, Ingham, Jackson, Kalamazoo, Kent, Midland, Muskegon, Oakland, Ottawaw, Saginaw, St. Clair, Washtenaw.

OTHER STATE DATABASE INFORMATION

Michigan Oil and Gas Wells
Source: Department of Environmental Quality
Telephone: 517-241-1528
Locations of oil and gas wells are compiled from permit records on file at the Geological Survey Division (GSD), Michigan Department of Natural Resources.

RADON

State Database: MI Radon
Source: Department of Environmental Quality
Telephone: 517-335-9551
Radon Test Results

Michigan Radon Test Results
Source: Department of Environmental Quality
Telephone: 517-335-8037
These results are from test kits distributed by the local health departments and used by Michigan residents. There is no way of knowing whether the devices were used properly, whether there are duplicates (or repeat verification) test (i.e., more than one sample per home), etc.

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EDR Historical Topo Map Report

10/01/24

Site Name:	Client Name:
409 Lentz CT	Triterra
409 Lentz CT	1305 S. Washington Avenue Suite 102
Lansing, MI 48917	Lansing, MI 48910
EDR Inquiry # 7779935.4	Contact: Alexsis Bowen

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Triterra were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*	
P.O.#	NA	**Latitude:**	42.730057 42° 43' 48" North
Project:	NA	**Longitude:**	-84.591565 -84° 35' 30" West
		UTM Zone:	Zone 16 North
		UTM X Meters:	697169.44
		UTM Y Meters:	4733651.57
		Elevation:	879.50' above sea level

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Triterra were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

RE: PIP Plan Approval

Dear Mr. Sika;

I have reviewed your Pollution Incident Prevention Plan (PIPP) for the above facility mentioned. The plan meets the Ingham County Health Department's requirements for a Pollution Incident Prevention Plan and shall be approved.

I appreciate your cooperation and effort for participating in this preventive program. The PIPP will assure that Michigan's water resources will be protected for years to come.

Sincerely,

Rene Franco

SUBJECT: Hazardous Waste Compliance Inspection, Westside Car Care, 409 Lentz Court, Lansing, MI, 48917.

Dear Mr. Sullivan:

On August 16, 2000, the Ingham County Health Department (ICHD) staff conducted an inspection of Westside Car Care located at the above address to evaluate compliance of this facility with the requirements of Part 111 of the Natural Resources and Environmental Protection Act, 1994 PA 451, MCL 324.11101 et seq. (Part 111); Subtitle C of the Federal Resource Conservation and Recovery Act (RCRA), as amended, Part 121: Liquid Industrial Wastes, MCL 324.12101 et seq. (Part 121) and any regulations promulgated pursuant to these Acts.

Based upon information obtained and observations made during the inspection, ICHD staff determined that Westside Car Care is in compliance with the requirements of Part 111, Subtitle C of RCRA.

Though no violations were noted during the inspection, the following comments and/or issues were identified:

1. Westside Car Care must label the used oil tanks with the words "Used Oil" as per Part 111 Rule 810(3) and 40 CFR 279.22(c)(1).

In closing, I provided you a copy of the used oil and conditionally exempt small quantity generator regulations for your information.

If you have any questions regarding this inspection please contact me at 517-887-4517 at your convenience.

Sincerely,

Mark C. Piavis
Bureau of Environmental Health

Dear Mr. Sika:

I have reviewed the letter you sent in response to my 7-31-95 inspection, which I performed as a representative of the Michigan Department of Environmental Quality (MDEQ), and the U.S. Environmental Protection Agency.

Your letter has addressed the violations noted during the inspection and is adequate demonstration of compliance with the provisions of Act 451, Part 111 and RCRA evaluated at the time of inspection. Please note that if changes in your operations occur, you may be subject to other provisions of the regulations.

Staff will return to verify your proper management of hazardous waste at a later date. Thank you for your cooperation.

Dear Ms. Knorek,

In reference to your letter dated 7-31-95 regarding our need to construct a secondary containment for the outside waste oil storage, I am requesting more time to complete this storage.

As per the guidelines sent, we will be constructing a covered containment bin for our outside waste oil storage. Completion time would be by the 1st of November, 1995.

If there is a problem with the time noted, please contact me.

Thank you.

Sincerely,

Westside Car Care
Attn: Troy Sika
404 Lentz Ct.
Lansing, MI 48917

Dear Mr. Sika:

This letter is in regard to my 7-10-95 inspection of the facility at the above location, acting as a representative of the Michigan Department of Natural Resources (MDNR), and the U.S. Environmental Protection Agency. The inspection was to evaluate your compliance with hazardous waste regulations; Michigan's Act 451, Part 111 and the Resource Conservation and Recovery Act (RCRA).

My inspection revealed that your facility was a conditionally exempt small quantity generator of hazardous waste and was in violation of Act 451, Part 111 and/or RCRA.

Specifically, non-compliance was found in the following area(s):

* Secondary containment is required for the outside waste oil storage. Enclosed is a booklet to assist you with the design and construction of the containment.

A written response to this letter is required by 8-25-95, providing documentation of the action(s) you have taken to comply with requirements above. If you feel that more time is needed, please submit a timetable for completing the actions. Your facility's status will be reviewed following your response.

Please contact me if you have questions about hazardous waste management. Thank you for your cooperation.

Sincerely,

Martha Knorek

RE: Pollution Incident Prevention Plan

Dear Mr. Sika;

This letter is in regard to my inspection of your facility. The inspection was conducted under a contractual agreement between the Michigan Department of Environmental Quality (MDEQ) and the Ingham County Health Department to administer the groundwater compliance requirements set forth in the Part 5 Rules of Public Act 451, Part 31 of N.R.E.P.A. The rules require that a facility must develop a Pollution Incident Prevention Plan (PIPP) if it meets one of the three criteria:

- Stores new or used oil or materials on the Critical Materials Register.
- Has an outdated Pollution Incident Prevention Plan on file.
- Has a groundwater discharge permit.

This preventive program was established to minimize the number of spills and losses of polluting materials which can potentially contaminate the groundwater and/or surface waters of the State of Michigan.

On January 30, 2007, I conducted an inspection of your facility. During my inspection, I identified all polluting materials as well as all storage locations. As an Ingham County Health Department representative, I recommend that a PIP Plan be developed for your facility.

Enclosed is a PIP Plan that I developed for your business. Please review and make any changes necessary and mail it back to my office within 30 days. After I receive your PIPP Plan, I'll mail you an updated PIPP with an approval letter. The PIP Plan should be kept on file at your facility so our staff can update it every 2 to 3 years. If you have any question regarding my letter, please feel free to contact me at 887-4526. Thank you for your cooperation.

Sincerely,

Rene Franco
Environmental Health Specialist

POLLUTION INCIDENT PREVENTION PLAN

1. IDENTIFICATION INFORMATION

Westside Car Care
409 Lentz Court
Lansing, MI 48917

Phone (517) 484-6199
24 Hr. (517)

Contact Persons-Troy Sika

Waste Disposal & Cleanup Contractors:
Currently all waste oil is burned in a oil burner.

Type of Facility: Westside Car Care is a automotive repair facility.

Items being stored (See MSDS for specific product information)

2. MATERIALS USED or STORED

A.	New Oil (5w-30)	1-275 gallon tank
B.	New Oil (10w-30)	1-275 gallon tank
C.	New Oil (10w-40)	1-55 gallon drum
D.	New Oil (5w-20)	1-55 gallon drum
E.	Waste Oil	1-500 gallon tank
F.	Waste Oil	1-450 gallon tank
G.	Waste Oil	1-275 gallon tank
H.	Parts Washer	1-30 gallon drum
I.	Dexron	1-275 gallon tank
J.	Grease	1-15 gallon drum
K.	Antifreeze	4-55 gallon drums

3. FIXED STORAGE

A.	New Oil	1-275 gallon tank
B.	New Oil	1-275 gallon tank
C.	Waste Oil	1-500 gallon tank
D.	Waste Oil	1-450 gallon tank
E.	Waste Oil	1-275 gallon tank
F.	Dexron	1-275 gallon tank

4. PORTABLE STORAGE

A.	New Oil	2-55 gallon drums
B.	Parts Cleaner	1-30 gallon drum
C.	Grease	1-15 gallon drum
D.	Antifreeze	4-55 gallon tank

5. TOTAL OIL STORAGE

   A. 2175 gallons

6. CONTAINMENT AREAS

   A. All solvents are stored within the facility.

7. LOADING or UNLOADING

   A. Waste oil is poured into the 2-275 gallon, 1-500 gallon or the 450 gallon above ground storage tanks.
   B. An attendant is present during all loading and unloading procedures.
   C. Spill equipment is located at the loading and unloading bay areas.
   D. No manifest is required for tracking of waste materials generated at this location. The waste oil is stored on site and is used for fuel in the oil burner.

8. SPILL CONTROL

   A. Hi-Dri, all purpose absorbent, OSHA approved
   B. Rubber Gloves Eye Protection, Respitory Mask all available for clean-up personnel
   C. Shovels, Rakes 55 gal waste storage tanks also available
   D. All employees have had emergency training.

9. EMERGENCY NUMBERS/INFORMATION

A.	Department of Environmental Quality	1-517-625-4600
B.	Local Fire Dept.	911
C.	Local Police Dept	911
D.	Delhi Twp. Wastewater Treatment Plant	1-517-694-9231
E.	Ingham County Health Dept	1-517-887-4312
F.	Ingham County Health Dept.	1-517-485-2251
G.	Pollution Emergency Alert System	1-800-292-4706

WASTE DETERMINATION (Rule 302: 40 CFR 262.11)

1. Did the generator comply with the waste evaluation requirements of R 299.9302? (Rule 205(4)(a): 40 CFR 261.5(g)(1))	[X] ___ NI N/A
2. If the generator accumulated over 1000 kg of hazardous waste or 1 kg of acute or severely toxic hazardous waste did the facility comply with the special provisions of part 3 of Act 64 applicable to generators of between 100 kg to 1000 kg of hazardous waste in a calendar month for the waste that exceeded the limits? (Rule 205(2): 40 CFR 261.5(g)(2))	[ ] ___ NI (N/A)

Comments: _____

3. For hazardous waste that did not exceed the limits in question #2, did the generator either treat or dispose of the hazardous waste in an on-site facility or ensure delivery to an off-site treatment, storage or disposal facility which: (Rule 205(4)(b): 40 CFR 261.5(g)(3))	
a) Permitted under R 299.9502(3),(4), or (5). (Rule 205(4)(b)(i))	[X] ___ NI N/A
b) A facility which stores or treats the waste and which is permitted or licensed pursuant to Act 641, Act 245, or Act 348. (Rule 205(4)(b)(ii))	[X] ___ NI N/A
c) A facility which disposes of the waste and which is in compliance with Act 641, Act 245, or Act 348. (Rule 205(4)(b)(iii))	[X] ___ NI N/A

Comments: _____

	YES	NO	NI	N/A
d) Facility which beneficially uses or reuses, or legitimately recycles or reclaims the waste or treats the waste before beneficial use or reuse, reclamation or recycling. (Rule 205(4)(b)(iv))	[X]	___	NI	N/A
e) An off-site POTW which is in compliance with Federal, State and Local requirements. (Rule 205(4)(b)(v))	[_]	___	NI	(N/A)
f) In another state and is permitted under 40 CFR part 270. (Rule 205(4)(b)(vi))	[_]	___	NI	(N/A)
g) In another state and is in interim status under of 40 CFR parts 270 and 265. (Rule 205(4)(b)(vii))	[_]	___	NI	(N/A)
h) Is in another state and is authorized to manage hazardous waste by that state. (Rule 205(4)(b)(viii))	[_]	___	NI	(N/A)
i) Is in another state and is licensed or registered by that state to manage municipal or industrial solid waste. (Rule 205(4)(b)(ix))	[_]	___	NI	(N/A)

Comments: _____

4. Is the hazardous waste accumulated in an area where the waste is protected from weather, fire, physical damage and vandals? (Rule 205(4)(c))	[X]	___	NI	N/A
5. Is the hazardous waste accumulation conducted so that hazardous waste or hazardous waste constituents cannot escape by gravity into the soil, directly or indirectly, into surface or groundwaters, or into drains or sewers and so that fugitive emissions are not in violation of the provisions of Act 348?	[_]	X	NI	N/A

Comments: No containment for waste oil

6. If the hazardous waste was sent to a person other than the generator who stored/accumulated the waste list the recipient of the waste (name, address, phone).

Phone (Day): 517 484-6199 Phone (Evening): 517 323-1642

Please use the following checklist to ensure that you have completed all required reporting components:

- ☑ Completed Business Information Sheet (Page 1)
- ☐ Completed Manufacturer Inventory (Page 2)
- ☐ Completed Hazardous Materials Inventory (Page 3)
- ☐ Completed Waste Materials Inventory (Page 4)
- ☐ Accurate Site Plan (See Page 6)

-OR-

- ☐ There are no changes to my last chemical inventory mailed to your office and ALL ELEMENTS of the Ingham County Pollution Prevention Chemical Status Sheet(s) remain ACCURATE and COMPLETE.
- ☐ Other documentation as provided in section 3.1 (SPCC, PIPP, RCRA, ect.)

I declare that the information on this status sheet is true and accurate to the best of my knowledge.

Signature: Troy Sike Printed Name: Troy Sike
Date: 1-10-13

The Ingham County Pollution Prevention Regulation establishes a reporting fee for all regulated facilities. Please find the enclosed invoice for this amount and mail the fee and status sheet(s) to the following address:

INGHAM COUNTY HEALTH DEPARTMENT
ENVIRONMENTAL HEALTH

Lansing, MI 48909-7661

TOXIC, HAZARDOUS, OR POLLUTING MATERIALS INVENTORY (FRESH CHEMICAL):

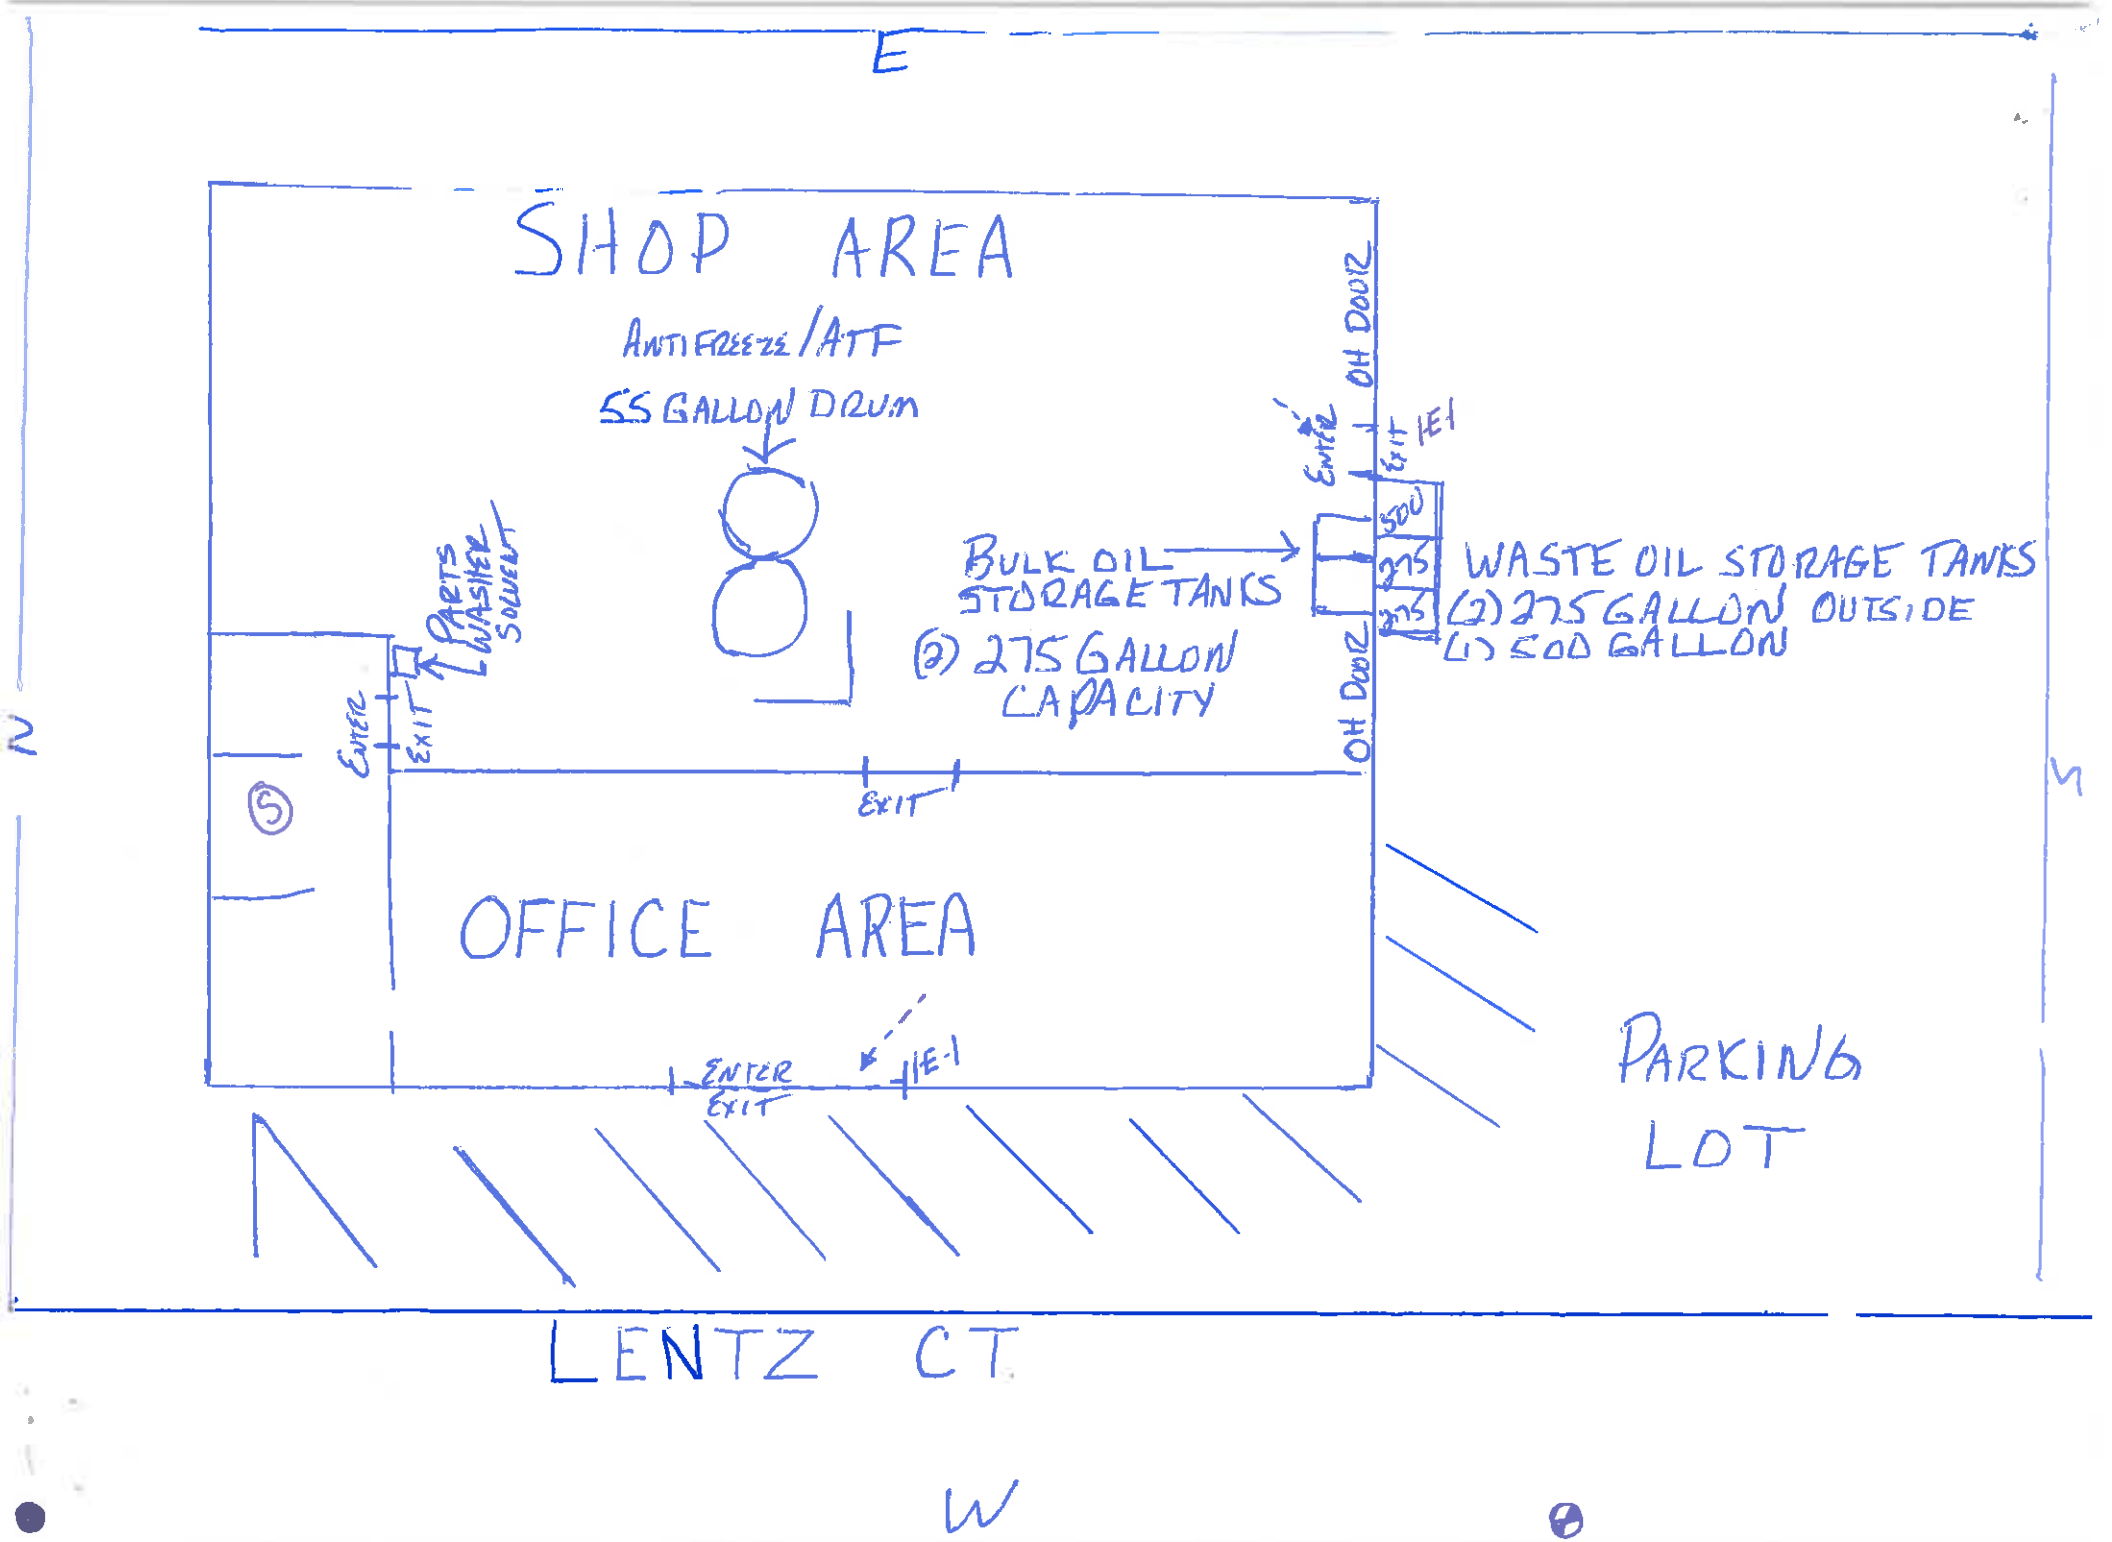

This inventory must include all raw materials (including oils and other petroleum based products) for which you have a material safety data sheet (MSDS). Make **additional copies of this sheet to list all materials if necessary.**

INFORMATION	INGREDIENTS	PERCENT	PHYSICAL STATE	CAS#	HAZARD	MAXIMUM STORAGE	END POINT	STORAGE TYPE
A) Common Name B) Manufacturer C) Storage Location	Chemical Names (Top three ingredients)	%	Solid Liquid Gas	CAS Nubmer (See MSDS or product label)	Class I-VIII (See Page 5 for instructions)	Maximum Storage Volume	Hauled Off-site Incorporated into product Sanitary Sewer Air Recycled Other	See Page 5 for instructions
Example:								
A) Lacquer Thinner	Toluene	46%	L	108-88-3	Class 3, 6	40 gallons	I.H	D
B) ACME Chemical	Xylene	32%		1330-20-7				
C) Paint Room	Benzene	22%		71-43-2				
A) Motor Oil B) Shell 5w30 C) Storage Tank 150 Gallon	Blend of Polyolefin + Crude Oil	100%	Liquid	64742-54-7	Class 3	150 gallons	O Burned in waste oil furnace	A
A) Motor Oil 5W30 B) Shell Oil C) Quarts - Shelf	Blend of Mineral Oils + Polyolefin Additives	100%	Liquid	64742-54-7	Class 3	24-Quarts	O Burned in waste oil furnace	A
A) Anti Freeze B) Pride C) Shelf - Shop Floor	Ethylene Glycol Rust Inhibitor	90% 10%	Liquid	107-21-1	Class 6	55 Gallons	R	D
A) Trans Fluid B) Ashland Oil C) Shelf	Paraffinic Distillate Lube Additive	90% 10%	Liquid	64742-54-7	Class 3	60 Quarts	O Burned in waste oil furnace	N
A) Gear Oil B) Texaco C) Shelf	De-Waxed Petroleum Residue, hydrotreated Olefin Sulfide	85% 15%	Liquid	64742-65-0 64742-57-0	Class 3	12 Quarts	O Burned in waste oil furnace	N
Brake Clean Aerosol-Volatile Shelf	Toluene Methyl Alcohol Aliphatic Petro Distelate	40% 30% 30%	Liquid	108-88-3 67-56-1 64742-89-8	Class 3	24-20oz CANS	I	F
Waste Fluid Recy Oil 60 Shop Floor	Methyl Alcohol Cob-Additive	99% 1%	Liquid	67-56-1	Class 3	55 gallons	I	D

WASTE MATERIALS INVENTORY:

This inventory is to be completed for all liquid industrial and hazardous wastes. **Make additional copies of this sheet to list all wastes if necessary.**

INFORMATION	INGREDIENTS	PERCENT	MAXIMUM AMOUNT	ANNUAL AMOUNT
A) DOT Shipping Name B) Waste Hauler C) Storage Location	Waste Chemical Name (Top three ingredients by percent)	Maximum %	Maximum amount at any time	Amount generated annually
Example:				
A) Waste Thinner	Paint	30%	30 gallons	180 gallons
B) Joe's Hauling	Xylene	20%		
C) Paint Room	Methyl Ethyl Ketone	50%		
A) SW30 Motor Oil B) Burned for heat C) Storage Tanks	Petroleum/mineral Polyedefin	100%	450 gallons	App. 450 gallons
A) Trans Fluid B) Burned for heat C) Storage Tanks	Petrolic Distillate Like Additive	90% 10%	55 gallons	Approx 110 gallons
A) Gear Oil B) Burned for heat C) Storage Tank	De Waxed Petroleum Olefin Sulfide	85% 15%	5 gallons	App. 15 gallons
A) B) C)	Note: All petroleum based products are burned in waste oil furnace.			
A) B) C)	Including; Motor Oil, trans oil, gear oil			
A) Waste Oil B) Oil burner C)			1150 gallons

Phase I Environmental Site Assessment
OWNER/OCCUPANT/SELLER QUESTIONNAIRE

Please complete this questionnaire to the best of your knowledge. **Please provide any legal descriptions, surveys, title records, parcel maps, environmental reports, etc.**

This questionnaire was completed by: Sandra Sika

Phone number: 517-703-6766 Email: sandrap8136@gmail.com

Affiliation with the Property: Owner Years affiliated with the Property: 27

Property address: 409 Lentz Court Lansing MI 48917

Property parcel number(s):

Describe Property structures, construction dates, and sizes:

List the Property's historic and current use and current occupants:

Currently unoccupied. Previous auto repair facility, Westside Car Care. Prior storage/office use.

Has the *Property or any adjoining site* been used as a gasoline station, vehicle repair facility, commercial printing facility, metal stamping/plating facility, dry cleaners, photo developing laboratory, junkyard, landfill, waste treatment or disposal, processing, recycling facility, or for any other manufacturing/industrial/ light industrial purpose that might use hazardous substances?

☑ Yes ☐ No ☐ Unknown ☐ Currently ☐ Historically Explain:

Auto repair facility.

Have there been aboveground/underground storage tanks, drums, or petroleum products/hazardous substances on the Property? ☑ Yes ☐ No ☐ Unknown Explain:

Above ground storage tanks, 275 G., housed in containment bins approved by Ingham Co. Health Dept.

Have there been any chemical releases, contamination, environmental cleanups, etc. on the Property?

☐ Yes ☑ No ☐ Unknown Explain:

Have there been any environmental site assessments of the Property that indicated the presence of contamination (Phase I ESA, Phase II ESA, Baseline Environmental Assessments, UST Removal reports)? ☐ Yes ☑ No ☐ Unknown Explain:

Have any waste materials, tires, automotive or industrial batteries, pesticides, paints, or other hazardous substances been stored on, buried, dumped, or used at the property?

☑ Yes ☐ No ☐ Unknown Explain: Tires stored outside building and recycled on regular basis.

Has fill dirt or other raw materials of unknown origin been brought onto the Property?

☐ Yes ☑ No ☐ Unknown Identify the date and location of fill: _____

Is there any obvious presence of Property contamination? (stains, spills, leaks, odors, etc.) ☑ Yes ☐ No

Explain: Stains, grease related to auto repair facility.

Do sites adjoining the Property have known environmental issues? ☐ Yes ☐ No ☑ Unknown

Explain: _____

Identify utilities available to the Property and **indicate the provider**:

- ☐ Electric: Lansing Board of Water & Light
- ☐ Gas: Consumers Energy
- ☐ Sanitary Sewer: West Side Water
- ☐ Storm Sewer: _____
- ☐ Municipal Water: West Side Water
- ☐ Municipal Solid Waste: Granger Container
- Private Well? _____
- Private Septic? _____

Any other pertinent information: _____

ALEXSIS BOWEN

ENVIRONMENTAL SCIENTIST

TRIOTERRA

Alexsis Bowen is an Environmental Scientist with Triterra. Her work focuses on Environmental Due Diligence Services. Alexsis also supports the Remediation Group and Natural Resources Group. Alexsis conducts Phase I Environmental Site Assessments (ESAs) and helps clients understand environmental risk associated properties. She conducts field assignments, data analysis, and technical report preparation. Alexsis understands regulatory requirements and considerations necessary for environmental due diligence projects.

AREAS OF EXPERTISE

- ASTM International Phase I ESAs, and Environmental Transaction Screens
- ASTM International Vapor Encroachment Screening
- BEAs and Due Care Evaluations
- Borehole Logging and Soil Classification
- Soil, Groundwater, Soil Gas, and Indoor Air sampling
- NEPA Part 50 & Part 58 Environmental Assessments

NOTABLE PROJECT EXPERIENCE

- Records Search with Risk Assessments
- Conducted Numerous Phase I ESAs, Subsurface Assessments, and BEAs for Residential and Commercial Sites, Including Auto Repair and Body Shop Sites
- MSHDA pre-approved Group A & B Consultant

EDUCATION

- BS Earth Science – 2020
  Tennessee Technological University – Cookeville, TN

CERTIFICATIONS

- Hazardous Waste Operations & Emergency Response (HAZWOPER) Training

MELISSA HUNTER

ASSOCIATE GEOLOGIST
DIRECTOR | DUE DILIGENCE

TRI TERRA

Melissa Hunter is a Geologist and Director of Due Diligence Services with Triterra. She oversees Phase I Environmental Site Assessments (ESAs), Phase II ESAs, Baseline Environmental Assessments (BEAs), and Due Care Evaluations. Her responsibilities include development and supervision of the Due Diligence Team; and consultation of due care obligations for Part 201 & Part 213 facilities, construction activities, and Brownfield projects. Melissa is current on regulatory requirements and guidelines, and she is proficient with site characterization, field assignments, and technical reports.

AREAS OF EXPERTISE

- ASTM International Phase I ESAs, Phase II ESAs, and Environmental Transaction Screens
- ASTM International Vapor Encroachment Screening
- Part 201 Environmental Remediation
- Part 213 Leaking Underground Storage Tank (LUST) Investigation & Remediation
- BEAs and Due Care Evaluations
- Due Care Planning and Documentation of Due Care Compliance
- Response Activity Plans and No Further Action Reports
- Borehole Logging and field screening
- Monitoring Well Installation Development, Oversight, and Sampling
- Soil, Groundwater, Soil Gas, and Indoor Air Sampling
- Analytical Data Evaluation and Pathway Compliance

NOTABLE PROJECT EXPERIENCE

- Over 12 years Environmental Consulting Experience
- Environmental Health & Safety Plans
- Brownfield Grant and Loan Programs
- Environmental Construction Plans
- Michigan State Housing and Development Authority (MSHDA) Review Requirements
- Underground Storage Tank Removal and Site Assessment
- Risk-Based Characterization and Closures
- Asbestos Containing Materials Inspections
- Remediation System Operations and Maintenance
- Environmental Construction Plans

EDUCATION

- BS Geology - 2011
  Western Michigan University, Kalamazoo, Michigan

CERTIFICATIONS

- State of Michigan Certified Wastewater Treatment Plant Operator (A-2d, B-1b)
- Hazardous Waste Operations & Emergency Response (HAZWOPER) Training
- ASTM International ESAs for Commercial Real Estate Course
